Assignment #1

Python Platform & Basic Image Processing

Requirements

1. Setup your Python coding environment (Google Colab or your Laptop/PC).
2. Learn OpenCV (cv2 in Python) with the tutorial “OpenCV_tutorial.ipynb”, which contains the function of opening a RGB image, image blurring, edge detection, and circle detection.
3. Explain and report the codes in **Part A**.
4. Implement the functions of image thresholding and image histogram by using OpenCV in **Part C** with the aids of Germini or ChatGPT.

Image Thresholding

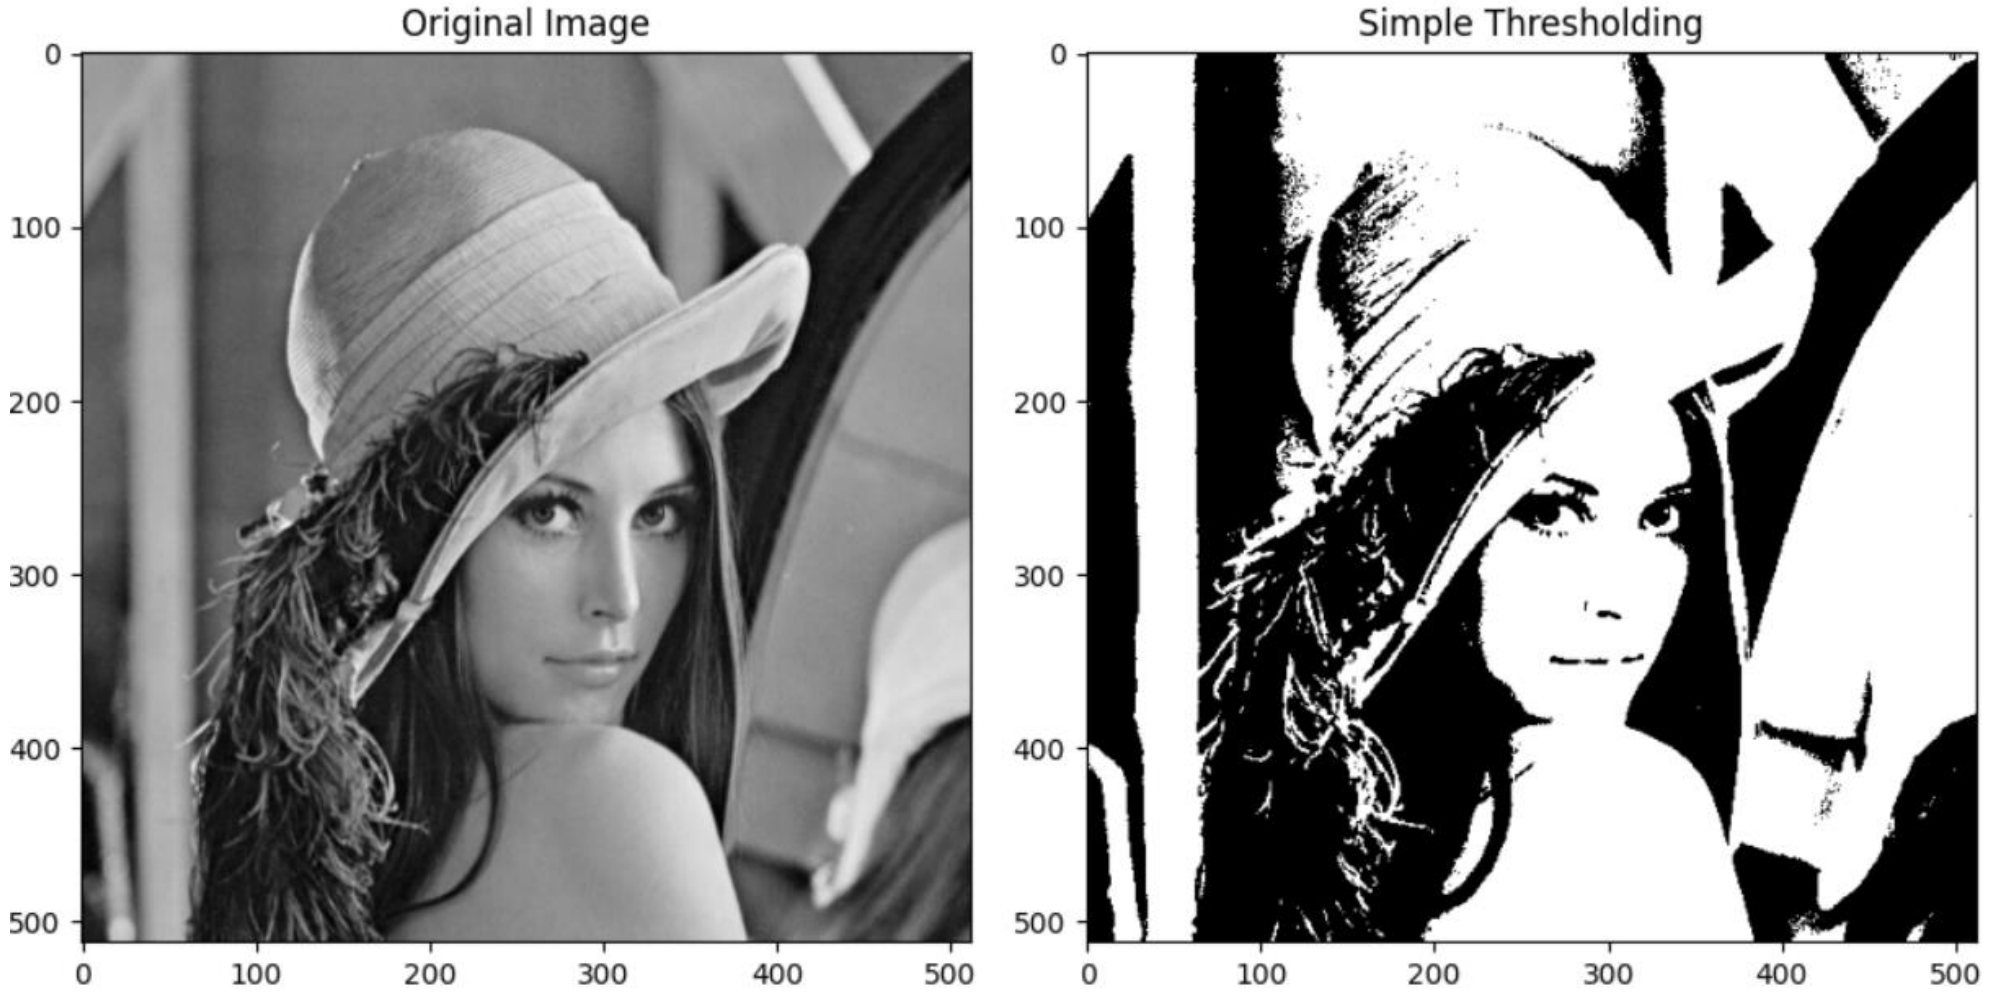

Image Histogram
